- **Project Management Tool** : Octane
- **CI-CD tools** : Jenkins.

## PROJECT HANDLED

---

### 1. Change Guardian (CG 6.0)

#### **Description:**

Change Guardian is a privileged user activity and change monitoring solution that helps you to respond to potential threats in real time through intelligent alerting of unauthorized access and changes to critical files, systems, and applications. The alerts contain highly enriched security information that includes the detail necessary to identify threat and record change-specifics such as who performed the action, what action was performed, when the action was taken, and where the action was taken-in addition to whether or not the action was authorized.

<b>Organization</b>	<b><u>Micro Focus</u></b>
<b>Role</b>	Associate Software Developer
<b>Project Undertaken</b>	Dec 2019 to till now
<b>Platform Used</b>	NodeJs, Angular 8, VB Script, HTML, CSS, UX-Aspects

#### **Contributions while developing the Project:**

- Migrated Existing Web Application from angular 6 to angular 8
- Worked on Arc Sight smart connector custom installer and added support for Office 365 and Amazon Web Services using VB Scripting.
- Have worked on progress bar in Login Module for better user experience.
- Migrated Window based reporting functionality to Web Based Reporting Service
- Implemented Export report to PDF and EXCEL from Web Application
- Customized and implemented many ux-aspects component while developing the report service
- Participate in the Sprint process and collaborate with development and production team throughout all stages of the SDLC
- Familiar with creating Build on Jenkin's
- Developed & performed unit testing.

## 2. Privileged Account Manager (PAM 3.5)

### Description:

NetIQ Privileged Account Manager delivers privileged user control, tracking and auditing for UNIX, Linux and Windows platforms giving you a single product to secure your entire server infrastructure. With NetIQ Privileged Account Manager, you centrally define rules for allowing or denying user activity based on a combination of user name, typed command, host name and time (who, what, where and when).

<b>Organization</b>	<b>Micro Focus</b>
<b>Role</b>	Associate Software Developer
<b>Project Undertaken</b>	Sep 2019 to Dec 2019
<b>Platform Used</b>	Angular 8, NodeJs, VB Script, HTML, CSS, UX-Aspects

### Contributions while developing the Project:

- Gone through trainings for Angular and Type Script based Web Application
- Worked on enhancement of web application to implement Role Based UI.
- Provided on time support for all kind of UI issues raised in the application.
- Contributed effort in Angular Migration.
